EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Thomas Ryan on November 9, 2005.
3. The application has been amended as follows:

Claim 5. (Currently Amended) A hinge assembly comprising:

- (a) a track having a length and a width;
- (b) a support extension attached to the track, the support extension having a planar bearing surface;
- (c) a first link pivotally attached to the support extension at a first pivot point, the first link movable between the closed position and an open position, the first link having a given length, and the bearing surface underlying the given length of the first link in the closed position;
- (d) a second link pivotally attached to the support extension at a second pivot point spaced apart from the first pivot point, the second link movable between a closed position and an open position, the bearing surface underlying at least a portion of a length of the second link in the closed position;
- (e) a shoe slidably engaging the track;

Art Unit: 3677

- (f) a sash bar pivotally attached to the first link;
- (g) a strut pivotally attached to the sash bar, the second link and to the shoe and
- (h) a tab in one of the first and second length being engageable with a capture recess in the other of the first and second links for transferring a limited range of angular motion between the first and second links,

wherein the tab and capture recess are shaped to accommodate unequal angular velocities of the first and second links about the first and second pivot points[[.]], and

wherein the support extension includes an integral end cap that is connected to the support extension beyond the length of the track.

Claim 6. (Cancelled)

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance: The prior art shows a hinge assembly comprising a track, a support extension, first and second links pivotally connected to the support extension at spaced apart points, a shoe slidably engaging the track, a sash a bar pivotally attached to the first link, a strut pivotally attached to the sash bar, and the second link attached to the shoe (Wu). The prior art also shows the first and second links to include corresponding tab and capture recesses (Stavenau et al). The prior art fails to show each of the above elements in combination with the support extension extending beyond the length of the track, and further having an end cap connected to the support extension beyond the length of the track. As shown by the prior art, a "track" in a hinge of this type, is the portion where a shoe

is retained and my slide along a length. In the present invention, the support extension extends beyond the length of the track. A shoe may not slide along the length of the support extension.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Kyle whose telephone number is 571-272-7057. The examiner can normally be reached on Monday - Friday, 8:30 am - 5:00 pm.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
